

ZG2

Smart Gateway

The smart gateway is the control center of the security alarm system. Users can add, manage and control Zigbee sensors through the gateway. The alarm messages of the sensors are all reported by the gateway to the Imou cloud platform, and finally pushed to the user APP.

Minimalist design

Smaller volume and lighter weight

One-key configuration

Switch Home/Away/Disarm mode with one click

Remote APP control

Configure and view the state of the gateway through the APP

Local area network linkage

After the configuration, the home without network can still alarm

32-way sub-device access

A maximum of 32 sub-devices can be configured under the gateway

Built-in Siren

Remind your family of the alarm by sound
