Door/Window Sensor

The door/window sensor can monitor the opening/closing of doors, windows, cabinet doors, drawers. When the magnet is separated from the sensor by a certain distance, it can notify the gateway through wireless signals in time to achieve alarm and other intelligent scene linkage.

25mm trigger alarm

High sensitivity, abnormal doors and Windows alarm in time

Tamper-proof design

Prevent the sensor from being maliciously removed

Paste and use

Easy to install anywhere in the home

Low voltage reminder

Help managers know the equipment beyond the service life in time

Smart scene linkage

Interconnect with other smart home devices, such as IPC and light bulbs

1 year long standby

Reduce the hassle of frequent battery changes
