It's probably the easiest way to make your door smart

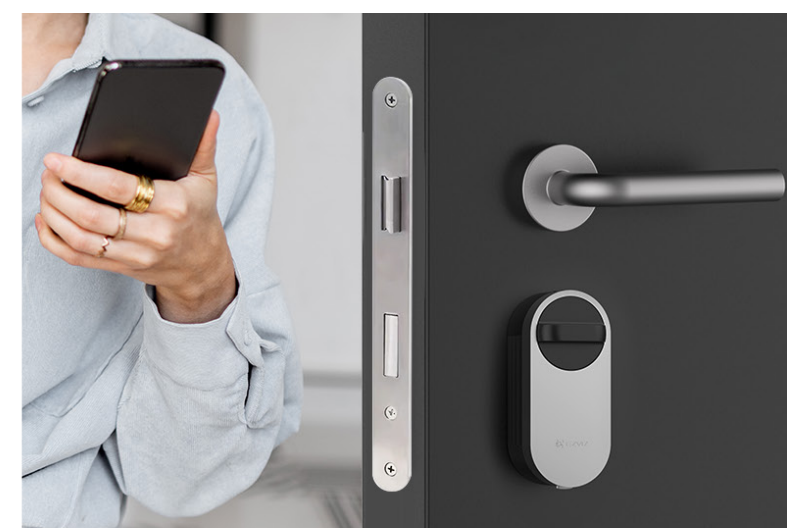

Want the convenience of a smart lock, but hesitant about replacing the whole lock body and leaving ugly marks on your door?

Simply attach EZVIZ's Smart Lock to your existing deadbolt on the inside without any drilling or removal. Enjoy all the smart features while the original keys can still be used whenever needed.

Sleek Design For a Modern Home

Convenience For a Smart Home

Tested Security For a Safe Home

Installation is a breeze

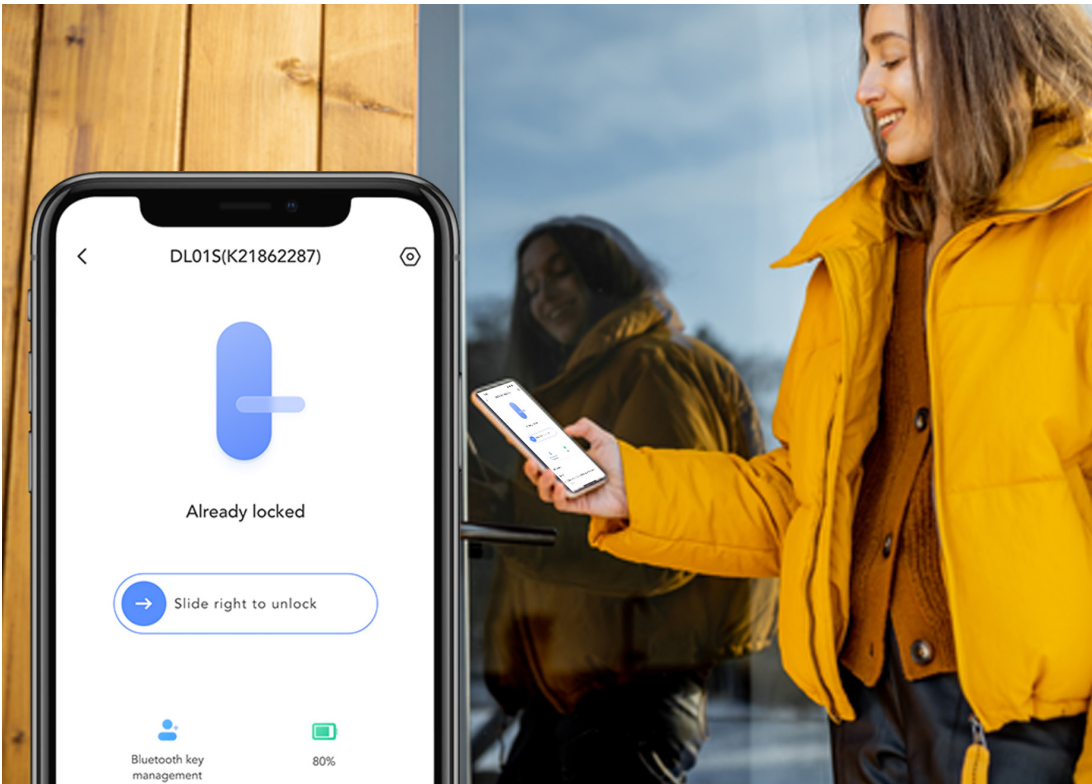

Upgrade your deadbolt with this smart lock in no more than 10 minutes! Simply mount it on the door from the inside. No screwing, drilling, or permanent changes are required.

*Follow our [Installation Check](#) to find out if EZVIZ Smart Lock fits your door

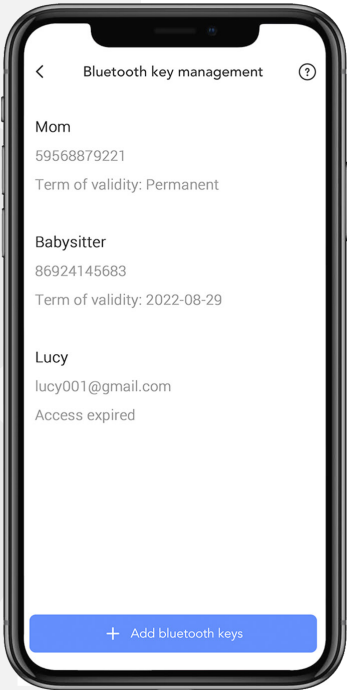

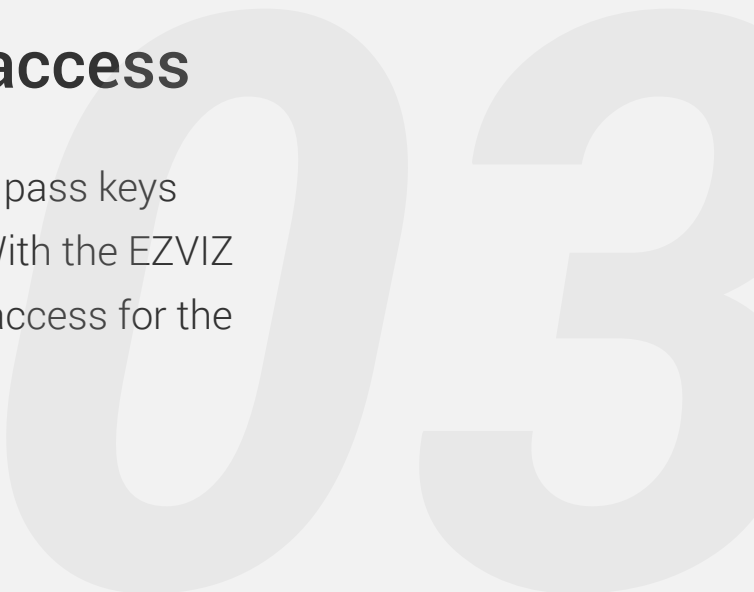

Your smartphone is now a smart key

Finding keys in your bag or pocket is a thing of the past. Just slide to unlock the door using your phone whenever you arrive home. You may easily forget your keys when you go out, but that seldom happens with a phone.

Assign and manage secure access

For family or friends who visit, you don't need to pass keys around or try to hide them in vulnerable areas. With the EZVIZ app, you can create permanent or time-limited access for the ones you trust and add them to your user list.

Family members
who visit on holidays

Close friends
who come by often

Babysitters or pet walkers
who walk in regularly

Well-thought-out security for extra peace of mind

Auto-lock in case you forget

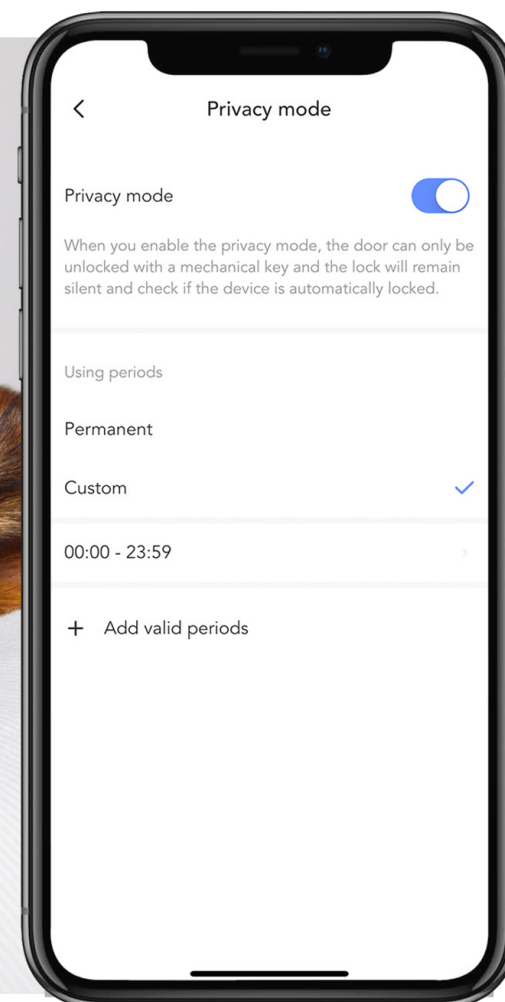

Going out in a hurry? The Smart Lock will lock itself after you close the door, so you don't stress yourself about a left-open access.

Auto-Lock

Auto-Lock Delaying Timer

Set do-not-disturb hours for sweeter dreams

When it's late or whenever you need privacy, you can schedule a time period to disable mobile unlocking.

Elegant design to fit your home taste

A fine finish and minimalist design work with any door and interior style

Award-winning user-friendliness means every use is easy & pleasant

Want to level up your convenience and connectivity?

Option 1

Add an EZVIZ Multi-functional Keypad to open with a code

Phone out of battery? Having kids who don't have their own smartphones? Anyone can open the door with your custom access code.

Option 2

Connect to an EZVIZ Home Gateway to always stay in the know

Away from home? You can still check the door status and know whenever it's opened with a real-time notification, after connecting the Smart Lock to this internet bridge.

Option 3

Get them both for the best experience!

Grant temporary access codes to visitors to let them in, even if you're far from home.

1 When not connected to the EZVIZ Home Gateway, the DL01S Smart Lock only allows user management and status check via Bluetooth. Users need to be in close proximity to the lock to use such features successfully.

2 One of two compatible keypads allows unlocking using the add-on proximity card. Please carefully check product details before making a purchase.

3 The temporary access code feature is only available when the lock is connected to both the keypad and the home gateway, sold separately.

Specifications

CS-DL01S
